WORK EXPERIENCE

Software Developer
Autonom8 Inc.

09/2022 - Present *Chennai, India*

- Experienced Web Application Developer with a specialized focus on regulatory compliance.
- Independently managed client relationships and gathered requirements.
- Led a team to develop and ensure the quality of robust BPMN platform-enabled web applications for Banking and Non-Banking Financial institutions.

EDUCATION

Bachelor of Engineering
Apollo Engineering College, Chennai

2018 - 2022 *CGPA : 7.9*

- Electronics and Communication Engineering

ACADEMIC PROJECTS

IOT based Vehicle Accident Detection, Monitoring and Alert System

- To ensure road safety for driver and to prevent drunk and drive. It detects accident and alert the guardian about accident and also monitor the drivers health parameters. All of those things were uploaded to the cloud server. Whenever a driver meets an accident cloud server sends the alert mail to the dear ones.
Password Door Lock System using ARDUINO UNO

- A digital code lock can secure a home or locker easily. It will open the door only when the right password is entered. Arduino UNO controls the complete processes like taking a password from the key pad module, comparing passwords, rotating servo motor and sending status to the LCD Display.
